SUBJECT INDEX

Aerodynamics

Bridge Deck Aeroelastic Admittance Revisited, Robert H. Scanlan, BE Feb. 00, p1-7.

Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

Theories of Aerodynamic Forces on Decks of Long Span Bridges, J. A. Jurado and S. Hernández, BE Feb. 00, p8-13.

Aeroelasticity

Theories of Aerodynamic Forces on Decks of Long Span Bridges, J. A. Jurado and S. Hernández, BE Feb. 00, p8-13.

Age factors

Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Anchorages

Anchorage of External Tendons in End Diaphragms, G. P. Wollmann, J. E. Breen and M. E. Kreger, BE Aug. 00, p208-215.

Arching

Behavior of Transverse Confining Systems for Steel-Free Deck Slabs, Baidar Bakht and Clifford Lam, BE May 00, p139-147.

Bearing capacity

Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.

Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Bearings

Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Slippage of Neoprene Bridge Bearings, Jamie McDonald, Ernest Heymsfield and R. Richard Avent, BE Aug. 00, p216-223.

Bending

Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.

Biographies

Leffert Lefferts Buck—Bridge Maker, Francis E. Griggs, Jr., BE Nov. 00, p271-283.

Bonding

Field Performance of FRP Bridge Repairs, J. M. Stallings, J. W. Tedesco, M. El-Mihilmy and M. McCauley, BE May 00, p107-113.

Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Bridge abutments

Simplified Model for Computer-Aided Analysis of Integral Bridges, Murat Dicleli, BE Aug. 00, p240-248.

Bridge construction

Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.

Leffert Lefferts Buck—Bridge Maker, Francis E. Griggs, Jr., BE Nov. 00, p271-283.

Bridge decks

Effect of Construction Loads and Vibrations on New Concrete Bridge Decks, Mahmoud A. Issa, Alfred A. Yousif and Mohsen A. Issa, P.E., BE Aug. 00, p249-258.

Endurance of Deck-to-Deck Connections in Transverse Hardwood Glulam Decks, Vincent D. LaCross, Harvey B. Manbeck, Ray W. Witmer, Jr., Jeffrey A. Laman and John J. Janowiak, BE Feb. 00, p84-89.

Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Bridge design

AASHTO-LRFD Live Load Distribution Specifications, Toorak Zokaie, BE May 00, p131-138.

Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Inelastic Design of Steel I-Girder Bridges, K. E. Barth and D. W. White, BE Aug. 00, p179-190.

Leffert Lefferts Buck—Bridge Maker, Francis E. Griggs, Jr., BE Nov. 00, p271-283.

Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Simplified Inelastic Design of Steel Girder Bridges, Michael G. Barker, P.E., Bryan A. Hartnagel, Charles G. Schilling, P.E. and Burl E. Dishongh, P.E., BE Feb. 00, p58-66.

Simplified Model for Computer-Aided Analysis of Integral Bridges, Murat Dicleli, BE Aug. 00, p240-248.

Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

Theories of Aerodynamic Forces on Decks of Long Span Bridges, J. A. Jurado and S. Hernández, BE Feb. 00, p8-13.

Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Bridge failure

Bridge Rating with Consideration for Fatigue Damage from Overloads, Jamshid Mohammadi and Ramakishna Polepeddi, BE Aug. 00, p259-265.

Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.

Bridge inspection

Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.

Survey and Evaluation of Damaged Concrete Bridges, Michael P. Enright and Dan M. Frangopol, BE Feb. 00, p31-38.

Bridge loads

Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.

Slippage of Neoprene Bridge Bearings, Jamie McDonald, Ernest Heymsfield and R. Richard Avent, BE Aug. 00, p216-223.

Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Bridge maintenance

Field Performance of FRP Bridge Repairs, J. M. Stallings, J. W. Tedesco, M. El-Mihilmy and M. McCauley, BE May 00, p107-113.

Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Bridge tests

Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Bridges

Bridge Rating with Consideration for Fatigue Damage from Overloads, Jamshid Mohammadi and Ramakishna Polepeddi, BE Aug. 00, p259-265.

Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Leffert Lefferts Buck—Bridge Maker, Francis E. Griggs, Jr., BE Nov. 00, p271-283.

Viscoelastic Dampers at Expansion Joints for Seismic Protection of Bridges, Maria Q. Feng, Jae-Min Kim, Masanobu Shinozuka and Rupa Purasinghe, BE Feb. 00, p67-74.

Bridges, arch

Dynamic Response and Fatigue of Steel Tied-Arch Bridge, Charles W. Roeder, Gregory MacRae, Paul Crocker, Kayoko Arima and Scott Wong, BE Feb. 00, p14-21.

Bridges, box girder

Anchorage of External Tendons in End Diaphragms, G. P. Wollmann, J. E. Breen and M. E. Kreger, BE Aug. 00, p208-215.

Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.

Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Bridges, cable-stayed

Design of Mechanical Viscous Dampers for Stay Cables, Habib Tabatabai, P.E. and Armin B. Mehrabi, P.E., BE May 00, p114-123.

Bridges, composite

Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.

Bridges, concrete

Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Survey and Evaluation of Damaged Concrete Bridges, Michael P. Enright and Dan M. Frangopol, BE Feb. 00, p31-38.

Thrust and Guide Devices for Launched Bridges, Marco Rosignoli, BE Feb. 00, p75-83.

Bridges, continuous

Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.

Bridges, girder

Behavior of Transverse Confining Systems for Steel-Free Deck Slabs, Baidar Bakht and Clifford Lam, BE May 00, p139-147.

Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.

Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.

Removal of Diaphragms from Three Span–Steel Girder Bridge, J. M. Stallings, T. E. Cousins and T. E. Stafford, BE Feb. 99, p63-70.

Simplified Inelastic Design of Steel Girder Bridges, Michael G. Barker, P.E., Bryan A. Hartnagel, Charles G. Schilling, P.E. and Burl E. Dishongh, P.E., BE Feb. 00, p58-66.

Bridges, highway

Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Bridges, spans

Bridge Deck Aeroelastic Admittance Revisited, Robert H. Scanlan, BE Feb. 00, p1-7.

Theories of Aerodynamic Forces on Decks of Long Span Bridges, J. A. Jurado and S. Hernández, BE Feb. 00, p8-13.

Bridges, steel

Evaluation of Strength Formulations for Horizontally Curved Flexural Members, James S. Davidson and Chai, H. Yoo, BE Aug. 00, p200-207.

Inelastic Design of Steel I-Girder Bridges, K. E. Barth and D. W. White, BE Aug. 00, p179-190.

Simplified Inelastic Design of Steel Girder Bridges, Michael G. Barker, P.E., Bryan A. Hartnagel, Charles G. Schilling, P.E. and Burl E. Dishongh, P.E., BE Feb. 00, p58-66.

Bridges, truss

Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.

Buckling

Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.

Buffeting

Bridge Deck Aeroelastic Admittance Revisited, Robert H. Scanlan, BE Feb. 00, p1-7.

California
Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Cast-in-place structures
Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Coating
Relaxation in High-Strength Bolted Connections Using Galvanized Steel, Jun Yang and John T. DeWolf, BE May 00, p99-106.

Composite beams
Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.

Computer aided design
Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.
Simplified Model for Computer-Aided Analysis of Integral Bridges, Murat Dicleli, BE Aug. 00, p240-248.

Concrete
Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.
Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Concrete, precast
Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.

Concrete, prestressed
Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.
Thrust and Guide Devices for Launched Bridges, Marco Rosignoli, BE Feb. 00, p75-83.

Concrete, reinforced
Behavior of Transverse Confining Systems for Steel-Free Deck Slabs, Baidar Bakht and Clifford Lam, BE May 00, p139-147.
Effect of Construction Loads and Vibrations on New Concrete Bridge Decks, Mahmoud A. Issa, Alfred A. Yousif and Mohsen A. Issa, P.E., BE Aug. 00, p249-258.
Field Performance of FRP Bridge Repairs, J. M. Stallings, J. W. Tedesco, M. El-Mihilmy and M. McCauley, BE May 00, p107-113.

Concrete slabs
Behavior of Transverse Confining Systems for Steel-Free Deck Slabs, Baidar Bakht and Clifford Lam, BE May 00, p139-147.

Concrete structures
Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Connections
Endurance of Deck-to-Deck Connections in Transverse Hardwood Glulam Decks, Vincent D. LaCross, Harvey B. Manbeck, Ray W. Witmer, Jr., Jeffrey A. Laman and John J. Janowiak, BE Feb. 00, p84-89.

Connections, bolted
Relaxation in High-Strength Bolted Connections Using Galvanized Steel, Jun Yang and John T. DeWolf, BE May 00, p99-106.

Construction
Effect of Construction Loads and Vibrations on New Concrete Bridge Decks, Mahmoud A. Issa, Alfred A. Yousif and Mohsen A. Issa, P.E., BE Aug. 00, p249-258.

Continuous beams
Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

Corrosion
Survey and Evaluation of Damaged Concrete Bridges, Michael P. Enright and Dan M. Frangopol, BE Feb. 00, p31-38.

Coverings
Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Cracking
Dynamic Response and Fatigue of Steel Tied-Arch Bridge, Charles W. Roeder, Gregory MacRae, Paul Crocker, Kayoko Arima and Scott Wong, BE Feb. 00, p14-21.
Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Curvature
Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.
Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.
Effects of Longitudinal Stiffeners on Curved I-Girder Webs, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p171-178.
Evaluation of Strength Formulations for Horizontally Curved Flexural Members, James S. Davidson and Chai, H. Yoo, BE Aug. 00, p200-207.
Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.

Cyclic loads
Endurance of Deck-to-Deck Connections in Transverse Hardwood Glulam Decks, Vincent D. LaCross, Harvey B. Manbeck, Ray W. Witmer, Jr., Jeffrey A. Laman and John J. Janowiak, BE Feb. 00, p84-89.

Damage assessment
Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.
Survey and Evaluation of Damaged Concrete Bridges, Michael P. Enright and Dan M. Frangopol, BE Feb. 00, p31-38.

Damping
Design of Mechanical Viscous Dampers for Stay Cables, Habib Tabatabai, P.E. and Armin B. Mehrabi, P.E., BE May 00, p114-123.
Viscoelastic Dampers at Expansion Joints for Seismic Protection of Bridges, Maria Q. Feng, Jae-Min Kim, Masanobu Shinozuka and Rupa Purasinghe, BE Feb. 00, p67-74.

Damping ratio
Design of Mechanical Viscous Dampers for Stay Cables, Habib Tabatabai, P.E. and Armin B. Mehrabi, P.E., BE May 00, p114-123.

Decks
Behavior of Transverse Confining Systems for Steel-Free Deck Slabs, Baidar Bakht and Clifford Lam, BE May 00, p139-147.

Delaminating
Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Design criteria
Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.
Thrust and Guide Devices for Launched Bridges, Marco Rosignoli, BE Feb. 00, p75-83.

Design improvements
Simplified Model for Computer-Aided Analysis of Integral Bridges, Murat Dicleli, BE Aug. 00, p240-248.

Deterioration
Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.
Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Diaphragms
Anchorage of External Tendons in End Diaphragms, G. P. Wollmann, J. E. Breen and M. E. Kreger, BE Aug. 00, p208-215.
Removal of Diaphragms from Three Span–Steel Girder Bridge, J. M. Stallings, T. E. Cousins and T. E. Stafford, BE Feb. 99, p63-70.

Displacement
Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.

Dynamic analysis
Effect of Construction Loads and Vibrations on New Concrete Bridge Decks, Mahmoud A. Issa, Alfred A. Yousif and Mohsen A. Issa, P.E., BE Aug. 00, p249-258.

Dynamic loads
Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.

Dynamic response
Dynamic Response and Fatigue of Steel Tied-Arch Bridge, Charles W. Roeder, Gregory MacRae, Paul Crocker, Kayoko Arima and Scott Wong, BE Feb. 00, p14-21.
Dynamic Response of Elevated High-Speed Railway, Yung-Hsiang Chen and Chen-Yu Li, BE May 00, p124-130.

Earthquake damage
Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.

Earthquake engineering
Viscoelastic Dampers at Expansion Joints for Seismic Protection of Bridges, Maria Q. Feng, Jae-Min Kim, Masanobu Shinozuka and Rupa Purasinghe, BE Feb. 00, p67-74.

Efficiency
Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Elastomer
Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.
Slippage of Neoprene Bridge Bearings, Jamie McDonald, Ernest Heymsfield and R. Richard Avent, BE Aug. 00, p216-223.

Elevated structures
Dynamic Response of Elevated High-Speed Railway, Yung-Hsiang Chen and Chen-Yu Li, BE May 00, p124-130.

Emergency management
Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.

Energy dissipation
Viscoelastic Dampers at Expansion Joints for Seismic Protection of Bridges, Maria Q. Feng, Jae-Min Kim, Masanobu Shinozuka and Rupa Purasinghe, BE Feb. 00, p67-74.

Equipment
Thrust and Guide Devices for Launched Bridges, Marco Rosignoli, BE Feb. 00, p75-83.

Esthetics
Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Expansion joints
Viscoelastic Dampers at Expansion Joints for Seismic Protection of Bridges, Maria Q. Feng, Jae-Min Kim, Masanobu Shinozuka and Rupa Purasinghe, BE Feb. 00, p67-74.

Failures
Slippage of Neoprene Bridge Bearings, Jamie McDonald, Ernest Heymsfield and R. Richard Avent, BE Aug. 00, p216-223.

Fatigue
Bridge Rating with Consideration for Fatigue Damage from Overloads, Jamshid Mohammadi and Ramakishna Polepeddi, BE Aug. 00, p259-265.
Dynamic Response and Fatigue of Steel Tied-Arch Bridge, Charles W. Roeder, Gregory MacRae, Paul Crocker, Kayoko Arima and Scott Wong, BE Feb. 00, p14-21.
Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.
Endurance of Deck-to-Deck Connections in Transverse Hardwood Glulam Decks, Vincent D. LaCross, Harvey B. Manbeck, Ray W. Witmer, Jr., Jeffrey A. Laman and John J. Janowiak, BE Feb. 00, p84-89.
Removal of Diaphragms from Three Span–Steel Girder Bridge, J. M. Stallings, T. E. Cousins and T. E. Stafford, BE Feb. 99, p63-70.

Fiber reinforced plastics

Field Performance of FRP Bridge Repairs, J. M. Stallings, J. W. Tedesco, M. El-Mihilmy and M. McCauley, BE May 00, p107-113.

Field tests

Dynamic Response and Fatigue of Steel Tied-Arch Bridge, Charles W. Roeder, Gregory MacRae, Paul Crocker, Kayoko Arima and Scott Wong, BE Feb. 00, p14-21.

Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.

Finite difference method

Design of Mechanical Viscous Dampers for Stay Cables, Habib Tabatabai, P.E. and Armin B. Mehrabi, P.E., BE May 00, p114-123.

Finite element method

Anchorage of External Tendons in End Diaphragms, G. P. Wollmann, J. E. Breen and M. E. Kreger, BE Aug. 00, p208-215.

Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Evaluation of Strength Formulations for Horizontally Curved Flexural Members, James S. Davidson and Chai. H. Yoo, BE Aug. 00, p200-207.

Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

Viscoelastic Dampers at Expansion Joints for Seismic Protection of Bridges, Maria Q. Feng, Jae-Min Kim, Masanobu Shinozuka and Rupa Purasinghe, BE Feb. 00, p67-74.

Fire safety

Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

Flutter

Bridge Deck Aeroelastic Admittance Revisited, Robert H. Scanlan, BE Feb. 00, p1-7.

Friction factor

Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.

Glued-laminated timber

Endurance of Deck-to-Deck Connections in Transverse Hardwood Glulam Decks, Vincent D. LaCross, Harvey B. Manbeck, Ray W. Witmer, Jr., Jeffrey A. Laman and John J. Janowiak, BE Feb. 00, p84-89.

Grillages

Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.

Gusts

Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

High strength concretes

Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

High strength steel

Relaxation in High-Strength Bolted Connections Using Galvanized Steel, Jun Yang and John T. DeWolf, BE May 00, p99-106.

Highways

Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.

History

Leffert Lefferts Buck—Bridge Maker, Francis E. Griggs, Jr., BE Nov. 00, p271-283.

I beams

Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Inelastic action

Inelastic Design of Steel I-Girder Bridges, K. E. Barth and D. W. White, BE Aug. 00, p179-190.

Simplified Inelastic Design of Steel Girder Bridges, Michael G. Barker, P.E., Bryan A. Hartnagel, Charles G. Schilling, P.E. and Burl E. Dishongh, P.E., BE Feb. 00, p58-66.

Influence lines

Dynamic Response of Elevated High-Speed Railway, Yung-Hsiang Chen and Chen-Yu Li, BE May 00, p124-130.

Instrumentation

Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Interfaces

Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.

Laminates

Field Performance of FRP Bridge Repairs, J. M. Stallings, J. W. Tedesco, M. El-Mihilmy and M. McCauley, BE May 00, p107-113.

Lattice design

Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Launching

Thrust and Guide Devices for Launched Bridges, Marco Rosignoli, BE Feb. 00, p75-83.

Live loads

AASHTO-LRFD Live Load Distribution Specifications, Toorak Zokaie, BE May 00, p131-138.

Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Load and resistance factor design

AASHTO-LRFD Live Load Distribution Specifications, Toorak Zokaie, BE May 00, p131-138.

Inelastic Design of Steel I-Girder Bridges, K. E. Barth and D. W. White, BE Aug. 00, p179-190.

Simplified Inelastic Design of Steel Girder Bridges, Michael G. Barker, P.E., Bryan A. Hartnagel, Charles G. Schilling, P.E. and Burl E. Dishongh, P.E., BE Feb. 00, p58-66.

Load distribution

AASHTO-LRFD Live Load Distribution Specifications, Toorak Zokaie, BE May 00, p131-138.

Load tests

Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.

Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.

Dynamic Response and Fatigue of Steel Tied-Arch Bridge, Charles W. Roeder, Gregory MacRae, Paul Crocker, Kayoko Arima and Scott Wong, BE Feb. 00, p14-21.

Loads

Effect of Construction Loads and Vibrations on New Concrete Bridge Decks, Mahmoud A. Issa, Alfred A. Yousif and Mohsen A. Issa, P.E., BE Aug. 00, p249-258.

Markov chains

Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Materials tests

Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.

Modeling

Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Simplified Model for Computer-Aided Analysis of Integral Bridges, Murat Dicleli, BE Aug. 00, p240-248.

Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Moment distribution

Experimental Verification of Horizontally Curved I-Girder Bridge Behavior, Brett A. McElwain and Jeffrey A. Laman, BE Nov. 00, p284-292.

Nondestructive tests

Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.

Overloads

Bridge Rating with Consideration for Fatigue Damage from Overloads, Jamshid Mohammadi and Ramakishna Polepeddi, BE Aug. 00, p259-265.

Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Permits

Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Plate girders

Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.

Effects of Longitudinal Stiffeners on Curved I-Girder Webs, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p171-178.

Inelastic Design of Steel I-Girder Bridges, K. E. Barth and D. W. White, BE Aug. 00, p179-190.

Plates

Field Performance of FRP Bridge Repairs, J. M. Stallings, J. W. Tedesco, M. El-Mihilmy and M. McCauley, BE May 00, p107-113.

Post tensioning

Anchorage of External Tendons in End Diaphragms, G. P. Wollmann, J. E. Breen and M. E. Kreger, BE Aug. 00, p208-215.

Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Prestressing

Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

Probabilistic methods

Survey and Evaluation of Damaged Concrete Bridges, Michael P. Enright and Dan M. Frangopol, BE Feb. 00, p31-38.

Properties

Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Rapid transit railways

Dynamic Response of Elevated High-Speed Railway, Yung-Hsiang Chen and Chen-Yu Li, BE May 00, p124-130.

Ratings

Bridge Rating with Consideration for Fatigue Damage from Overloads, Jamshid Mohammadi and Ramakishna Polepeddi, BE Aug. 00, p259-265.

Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.

Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Regression analysis

Modeling the Reduction in Load Capacity of Highway Bridges with Age, Steven B. Chase and László Gáspár, BE Nov. 00, p331-336.

Rehabilitation

Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.

Relaxation, mechanics

Relaxation in High-Strength Bolted Connections Using Galvanized Steel, Jun Yang and John T. DeWolf, BE May 00, p99-106.

Reliability
Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.
Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Reliability analysis
Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Retrofitting
Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Safety factors
Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.
Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Scale models
Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.
Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Segmented elements
Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.

Seismic analysis
Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.
Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

Seismic design
Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Sensitivity analysis
Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.
Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Service life
Survey and Evaluation of Damaged Concrete Bridges, Michael P. Enright and Dan M. Frangopol, BE Feb. 00, p31-38.

Shear
Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.
Slippage of Neoprene Bridge Bearings, Jamie McDonald, Ernest Heymsfield and R. Richard Avent, BE Aug. 00, p216-223.

Shear forces
Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.

Shear modulus
Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Slabs
Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Slipping
Slippage of Neoprene Bridge Bearings, Jamie McDonald, Ernest Heymsfield and R. Richard Avent, BE Aug. 00, p216-223.

Soil-structure interaction
Simplified Model for Computer-Aided Analysis of Integral Bridges, Murat Dicleli, BE Aug. 00, p240-248.

Specifications
AASHTO-LRFD Live Load Distribution Specifications, Toorak Zokaie, BE May 00, p131-138.

Steel
Effect of Friction on Shear Connection in Composite Bridge Beams, Deric J. Oehlers, Rudolf Seracino and Michael F. Yeo, BE May 00, p91-98.
Removal of Diaphragms from Three Span–Steel Girder Bridge, J. M. Stallings, T. E. Cousins and T. E. Stafford, BE Feb. 99, p63-70.

Steel structures
Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.

Stiffeners
Effects of Longitudinal Stiffeners on Curved I-Girder Webs, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p171-178.

Stiffness
Effect of Bearing Pads on Precast Prestressed Concrete Bridges, Nur Yazdani, P.E., Scott Eddy and Chun S. Cai, P.E., BE Aug. 00, p224-232.

Strength
Effects of Longitudinal Stiffeners on Curved I-Girder Webs, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p171-178.
Evaluation of Strength Formulations for Horizontally Curved Flexural Members, James S. Davidson and Chai, H. Yoo, BE Aug. 00, p200-207.

Stress
Comparison of Measured and Computed Stresses in Steel Curved Girder Bridge, Theodore V. Galambos, Jerome F. Hajjar, Wen-Hsen Huang, Brian E. Pulver, Roberto T. Leon and Brian J. Rudie, BE Aug. 00, p191-199.
Removal of Diaphragms from Three Span–Steel Girder Bridge, J. M. Stallings, T. E. Cousins and T. E. Stafford, BE Feb. 99, p63-70.

Stress distribution
Overlay for Concrete Segmental Box-Girder Bridges, Fang-Fu Tang, BE Nov. 00, p311-321.

Structural analysis
Deterioration Assessment and Rehabilitation Design of Existing Steel Bridge, Daniel N. Farhey, Razi Naghavi, Alper Levi, Aniruddha M. Thakur, Mark A. Pickett, Douglas K. Nims and A. Emin Aktan, BE Feb. 00, p39-48.
Dynamic Response of Elevated High-Speed Railway, Yung-Hsiang Chen and Chen-Yu Li, BE May 00, p124-130.

Structural behavior
Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.
Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

Structural members
Evaluation of Strength Formulations for Horizontally Curved Flexural Members, James S. Davidson and Chai, H. Yoo, BE Aug. 00, p200-207.
Section Properties for Latticed Members of San Francisco–Oakland Bay Bridge, Lian Duan, Mark Reno and Jason Lynch, BE May 00, p156-164.

Structural safety
Vehicular Overloads: Load Model, Bridge Safety, and Permit Checking, Gongkang Fu and Osman Hag-Elsafi, BE Feb. 00, p49-57.

Substructures
Improving Standard Bridges with Attention to Cast-in-Place Substructure, S. L. Billington and J. E. Breen, BE Nov. 00, p344-351.

Tendons
Anchorage of External Tendons in End Diaphragms, G. P. Wollmann, J. E. Breen and M. E. Kreger, BE Aug. 00, p208-215.
Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

Tennessee
Evaluation of Seismic Damage to Memphis Bridges and Highway Systems, Howard Hwang, John B. Jernigan and Yang-Wei Lin, BE Nov. 00, p322-330.

Thermal stresses
Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

Thickness
Relaxation in High-Strength Bolted Connections Using Galvanized Steel, Jun Yang and John T. DeWolf, BE May 00, p99-106.

Time dependence
Long-Term Behavior of Continuous Precast Concrete Girder Bridge Model, Antonio R. Marí and Manuel Valdés, BE Feb. 00, p22-30.

Truck specifications
Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.
Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Ultimate loads
Overload and Ultimate Load Behavior of Posttensioned Slab Bridge, Paul N. Roschke and Kevin R. Pruski, BE May 00, p148-155.

Viaducts
Externally Prestressed High Strength Concrete Viaduct, Angel C. Aparicio, Gonzalo Ramos and Juan R. Casas, BE Nov. 00, p337-343.

Vibration
Design of Mechanical Viscous Dampers for Stay Cables, Habib Tabatabai, P.E. and Armin B. Mehrabi, P.E., BE May 00, p114-123.

Vibration effects
Effect of Construction Loads and Vibrations on New Concrete Bridge Decks, Mahmoud A. Issa, Alfred A. Yousif and Mohsen A. Issa, P.E., BE Aug. 00, p249-258.

Viscosity
Design of Mechanical Viscous Dampers for Stay Cables, Habib Tabatabai, P.E. and Armin B. Mehrabi, P.E., BE May 00, p114-123.

Webs
Behavior of Curved I-Girder Webs Subjected to Combined Bending and Shear, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p165-170.
Effects of Longitudinal Stiffeners on Curved I-Girder Webs, James S. Davidson, Scott R. Ballance and Chai H. Yoo, BE May 00, p171-178.

Weight
Development of Truck Weight Regulations Using Bridge Reliability Model, Michel Ghosn, BE Nov. 00, p293-303.
Effect of Changing Truck Weight Regulations on U.S. Bridge Network, Michel Ghosn and Fred Moses, BE Nov. 00, p304-310.

Wind forces
Bridge Deck Aeroelastic Admittance Revisited, Robert H. Scanlan, BE Feb. 00, p1-7.
Special Studies for Vasco da Gama Bridge, Fernando A. Branco, Pedro M. Mendes and Luís M. C. Guerreiro, BE Aug. 00, p233-239.

Wind loads
Theories of Aerodynamic Forces on Decks of Long Span Bridges, J. A. Jurado and S. Hernández, BE Feb. 00, p8-13.
